➤ Learning Management System (LMS)

- The LMS has been developed to help you to access learning, training and development opportunities to support acquisition of skills, knowledge and understanding. You can access e-learning modules within this site, most of which are free of charge. You can book yourself onto face to face learning events - all your learning is recorded in your personal learner record.

e-learning modules are available on core subjects including:

- » Introduction to the TSC
- » Introduction to the ECC
- » Asset Management Toolkit

The learning gateway is constantly undergoing development and updated with new learning opportunities - provided by the MHA+ skills community, sector partners and our members, so login regularly to get the most from this free site.
