

**Category: Best use of technology to reduce cost/enhance productivity - SHORTLISTED**

**MHA+ member name**

Via East Midlands in partnership with Nottinghamshire County Council

**Summary**

Transformation of Nottinghamshire's Highway Service for the future - making it more efficient, safer, sustainable, and better for everyone who uses it.

We are using smart tools like data, analytics, and AI to understand what our roads and infrastructure asset's needs are, both individually and as a whole. These systems have been selected and designed to work together to help us make smarter and better decisions, focusing funding where it's needed most, and planning ahead for long-term maintenance across all types of assets.

Our aim is to thoughtfully apply technology to improve efficiency and outcomes, to make things work smarter, not harder.
